

November 15, 2002

The Honorable Donald Evans
Secretary
United States Department of Commerce
14th and Constitution NW
Washington, DC 20230

Dear Secretary Evans:

As a New York citizen who is concerned about our growing energy needs, I am writing to ask that you take action to support the appeal by the Millennium pipeline that is awaiting your action.

Energy costs in New York today are some of the highest in the nation, and each day there are more concerns that we are headed toward shortages and curtailments unless immediate decisions are made to invest in our energy systems.

It is troubling to me that a small group of affluent people who don't want the inconvenience of a utility near them are willing to jeopardize the energy security of tens of thousands of fellow New Yorkers.

This project has been studied and debated for more than four years. The agency in charge of this process – the FERC – issued a decision that this project should be completed.

Secretary Evans, for the benefit of all New York citizens, for clean air, jobs and energy security – please approve the Millennium appeal.

Sincerely,

Argento Rosa Local 60

The Honorable Donald Evans
Secretary
United States Department of Commerce
14th and Constitution NW
Washington, DC 20230

I am writing to encourage your support in upholding the Federal Energy Regulatory Commission's finding that the Millennium pipeline project is in the public interest, and that it is in fact consistent with the Coastal Zone Management Act.

Please review the Millennium on its merits. Do not allow the protests of a small but vocal group to deter a project that offers benefits for many.

Antonio Barajas
Local 60

Dear Secretary Evans:

I am writing to encourage your support in upholding the Federal Energy Regulatory Commission's finding that the Millennium pipeline project is in the public interest, and that it is in fact consistent with the Coastal Zone Management Act.

We must stop the practice of opposing every energy project just because a few individuals will be temporarily inconvenienced. Millennium will improve our national energy security, create thousands of jobs and economic development opportunities, and will help New York meet Clean Air Act requirements.

Please review the Millennium on its merits. Do not allow the protests of a small but vocal group to deter a project that offers benefits for many.

Sincerely

LIUNA

Washington, DC 20230

Dear Secretary Evans:

As a New York citizen who is concerned about our growing energy needs, I am writing to ask that you take action to support the appeal by the Millennium pipeline that is awaiting your action.

Energy costs in New York today are some of the highest in the nation, and each day there are more concerns that we are headed toward shortages and curtailments unless immediate decisions are made to invest in our energy systems.

It is troubling to me that a small group of affluent people who don't want the inconvenience of a utility near them are willing to jeopardize the energy security of tens of thousands of fellow New Yorkers.

This project has been studied and debated for more than four years. The agency in charge of this process – the FERC – issued a decision that this project should be completed.

Secretary Evans, for the benefit of all New York citizens, for clean air, jobs and energy security – please approve the Millennium appeal.

Sincerely,

A handwritten signature in cursive script, appearing to read "Linda Gale G.", written in dark ink.

The Honorable Donald Evans
Secretary
United States Department of Commerce
14th and Constitution NW
Washington, DC 20230

Dear Secretary Evans:

I am writing to encourage your support in upholding the Federal Energy Regulatory Commission's finding that the Millennium pipeline project is in the public interest, and that it is in fact consistent with the Coastal Zone Management Act.

We must stop the practice of opposing every energy project just because a few individuals will be temporarily inconvenienced. Millennium will improve our national energy security, create thousands of jobs and economic development opportunities, and will help New York meet Clean Air Act requirements.

Please review the Millennium on its merits. Do not allow the protests of a small but vocal group to deter a project that offers benefits for many.

Sincerely,

JRE Morgan Local 60
